Notes

- On activation, the subscription and allowance for the first month will be pro-rated.
 - The minimum duration period is counted from the date of activation. For example, a SIM is activated on 30 November with a minimum duration of 12 months, in this example; the minimum duration will finish on 29 November the following year, being 365 days from the day of activation.
 - On deactivation of a monthly plan, in the final month there will be pro-ration of subscriptions and allowances; a full month's subscription will be not charged and a full month's allowance will not be provided. Should there be usage in excess of the pro-rated allowance then this will be charged at the appropriate out of allowance run-on charge.
 - No activation fees will be charged on upgrading or downgrading to Rate Plans.
 - Subscriptions will continue to be charged after the minimum duration period has expired; this means that a SIM which is on a particular Rate Plan will continue to be charged at that subscription rate until a service order is received to either deactivate the SIM or to move it onto another Package Rate Plan. No new minimum duration period will be applied once the original minimum duration period has finished for the current Rate Plan that the SIM is provisioned against.
 - When a SIM first chooses a monthly in arrears Rate Plan, then the subscription charge that applies to that Rate Plan will be pro-rated; this pro-rating will be based on the date of activation and the number of days in the month or period of activation.
 - Should a SIM be suspended, then the subscription charge will continue to be payable during the period of suspension.
- **All Rate Plans will have a minimum duration period as specified for the chosen Rate Plan based on a 365 day year. When a SIM is deactivated before the end of this minimum duration period, any outstanding subscriptions will become due, unless the SIM is upgrading. Outstanding subscriptions are defined by multiplying the remaining portion of the minimum duration period by the subscription charge.**
- For an Allowance Rate Plan that is based on a period of a month, the (monthly) usage allowance will be pro-rated based on the date of activation (in the month of activation). Any portion of such an allowance, whether it is for a complete month or is pro-rated, that remains unused at the end of a month will be lost and therefore not available for use in the following month.
 - Where a plan has an allowance this will be defined as a Money Bundle or Money Allowance. All Allowance plans are Money Bundle plans which include Streaming IP, ISDN, SMS and Voice to other MSS Networks at undiscounted rates as well as Standard IP and voice to standard destinations at discounted rates dependant on the subscription commitment and allowance. For Geographic Plans - only Standard IP would receive the discount usage charge.
 - Once the user allowances within any Plans have been fully used, any additional usage will be charged at the out of allowance run-on charge.
 - The communication sessions in the "Data transmission over the Internet» (IP-traffic) are formed on the basis of the connections to the network. Such a formation is necessary for the implementation of the IP-traffic monitoring and cost calculation. Parameters of the formation of the communication sessions are as follows:
 - The achievement of traffic volume - 2 MB;
 - Duration of continuous connection – 12 hours;
 - Disconnect of the communication session.
 - The duration of each communication session is rounded up in the following increments :
 - «Telephone», «ISDN, Fax, Voice 3.1 kHz» - 15 seconds;
 - «Streaming IP» - 5 seconds;
 - «StandardIP» – 0,0195 Mb
 - Minimum paid traffic for each communication session:
 - «Telephony, «ISDN, Fax, Voice 3.1 kHz» - 30 seconds;
 - «Streaming IP» - 30 seconds;
 - «Standard IP» - 0,0977 Mb.
 - The total cost of telecommunications services per each SIM-card is settled as the sum of the costs of each communication

session, indicated in the CDR detail. The cost calculation of each communication session is made in accordance with the rules of mathematical rounding up to 2-decimal digits. The total cost of services (the invoice amount) for the billing period is defined as the sum of all final costs of communication services on each SIM-card.

- Incoming call (voice, FAX, ISDN) and mobile terminated SMS is free of charge
- Voice call on Prepaid Platform is free of charge and is not affecting on an allowance.
- Voice call forwarding to Voicemail number – free of charge
- Prices do not include VAT or any other applicable taxes.
- 1 Megabyte = 1024 Kilobytes = 1048576 bytes
- An SMS is up to 160 characters in size as defined by the GSM Association.
