Notes

- The communication sessions in the "Data transmission over the Internet» (IP-traffic) are formed on the basis of the connections to the network. Such a formation is necessary for the implementation of the IP-traffic monitoring and cost calculation. Parameters of the formation of the communication sessions are as follows:
 - The achievement of traffic volume - 2 MB;
 - Duration of continuous connection – 12 hours;
 - Disconnect of the communication session.
- The duration of each communication session is rounded up in the following increments :
 - «Telephone», «ISDN, Fax, Voice 3.1 kHz» - 15 seconds;
 - «Streaming IP» - 5 seconds;
 - «StandardIP» – 0,0195 Mb
- Minimum paid traffic for each communication session:
 - «Telephony, «ISDN, Fax, Voice 3.1 kHz» - 30 seconds;
 - «Streaming IP» - 30 seconds;
 - «Standard IP» - 0,0977 Mb.
- The total cost of telecommunications services per each SIM-card is settled as the sum of the costs of each communication session, indicated in the CDR detail. The cost calculation of each communication session is made in accordance with the rules of mathematical rounding up to 2-decimal digits. The total cost of services (the invoice amount) for the billing period is defined as the sum of all final costs of communication services on each SIM-card.
- Incoming call (voice, FAX, ISDN) and mobile terminated SMS is free of charge
- Voice call forwarding to Voicemail number – free of charge
- Prices do not include VAT or any other applicable taxes.
- 1 Megabyte = 1024 Kilobytes = 1048576 bytes
- An SMS is up to 160 characters in size as defined by the GSM Association.
